Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, certain unifying concepts consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as the basic unit of ...

Biology - Wikipedia

Sodium distribution in species Humans. The minimum physiological requirement for sodium is between 115 and 500 milligrams per day depending on sweating due to physical activity, and whether the person is adapted to the climate. Sodium chloride is the principal source of sodium in the diet, and is used as seasoning and preservative, such as for pickling and jerky; most of it comes from ...

Sodium in biology - Wikipedia

There are also these notes on the 7th edition of the Campbell Biology textbook. It's not the most recent version of the book, but it might be helpful. The main difference between these notes and the notes in the previous section is that they aren't organized by the College Board's "Big Ideas" for AP Biology, so it's not as easy to connect terms and concepts to larger themes as you review ...
