What is Theory? Theory explains how some aspect of human behavior or performance is organized. It thus enables us to make predictions about that behavior. The components of theory are concepts (ideally well defined) and principles. A concept is a symbolic representation of an actual thing - tree, chair, table, computer, distance, etc. Construct is the word for concepts with no physical ...

Choice theory contends that every part of our behaviour – thoughts, feelings, physiology and 'doings' is a choice. Every single part of it. And although feelings and physiology are harder to have any choice over, we do have free choice when it comes to our thoughts and 'doings', and these impact on the former two. Glasser argues that we have total agency in the entirety of our ...

A gauge theory is a type of theory in physics. The word gauge means a measurement, a thickness, an in-between distance (as in railroad tracks), or a resulting number of units per certain parameter (a number of loops in an inch of fabric or a number of lead balls in a pound of ammunition). Modern theories describe physical forces in terms of fields, e.g., the electromagnetic field, the ...
