Maintenance management is a continuous improvement process. The intention is to add value by improving equipment reliability while reducing cost of ownership. Clearly there is a balance to be had with cost of ownership versus additional value added, particularly with this strategy. There may be a higher cost of ownership; however, this is offset against the improvements to the production ...

Although treated as separate elements, preventive/predictive maintenance, Reliability Engineering, equipment history and functional pride and quality assurance are inextricably supportive—each to the others. Success of the preventive/predictive maintenance program is dependent upon the existence of the other three elements. While planning and scheduling assure the effective utilization of ...

PS Manual-Preventive and Predictive Maintenance

Software maintenance in software engineering is the modification of a software product after delivery to correct faults, to improve performance or other attributes.. A common perception of maintenance is that it merely involves fixing defects.However, one study indicated that over 80% of maintenance effort is used for non-corrective actions. This perception is perpetuated by users submitting ...
