Accounting is based on the principle of two-sided. In order to carry out business activities, the company needs funds; these funds must be given to the company by someone. The funds owned by the company are called assets. Part of these assets is provided by the owner, total amount of funds contributed by him is called owner's equity or capital. If the owner is the only one who contributed ...

Cost variance in manufacturing accounting is slightly different from traditional accounting cost variance. Manufacturing companies produce products by taking raw materials and turning them into finished goods. The formulas for variance still determine the difference between expected and actual costs in regards to materials, overhead, and labor. However, the output of manufacturing is tangible ...

Whole-life cost is the total cost of ownership over the life of an asset. The concept is also known as life-cycle cost (LCC) or lifetime cost, and is commonly referred to as "cradle to grave" or "womb to tomb" costs. Costs considered include the financial cost which is relatively simple to calculate and also the environmental and social costs which are more difficult to quantify and assign ...

Whole-life cost - Wikipedia
