What is MBD (model-based definition)? MBD is the process of using an annotated 3D CAD model that includes semantic PMI (product manufacturing information a.k.a. manufacturing data for building & measuring) to be the definitive authority downstream throughout the product lifecycle. It is a unifying aspect for design, manufacturing, quality, and other disciplines to move away from traditional 2D ...

MBD (Model-Based Definition): 2021 Edition

Unfortunately, resistance to end-user systems by managers and professionals is a widespread problem. To better predict, explain, and increase user acceptance, we need to better understand why people accept or reject computers. This research addresses the ability to predict peoples' computer acceptance from a measure of their intentions, and the ability to explain their intentions in terms of ...

User Acceptance of Computer Technology: A Comparison of ...

We are driving quality inspection technology trends: from contact to non-contact; from offline to integrated; from manual to automated. And, by using our metrology hardware and software solutions in parallel with manufacturing information technologies from the wider product lifecycle, we are driving new definitions of metrology and the quality department, and developing processes where quality ...
